

Padlock Protection™ Innovative Australian Patented Invention

"Steel Shroud" completely encloses a Padlock, its Shackle and both ends of the Chain

Three methods to break a Padlock or Mild Steel Chain are...

1. Twist the Padlock to make the Chain taut then place a spanner around the Padlock body then pull down and turn.

This is called a Leverage Attack.

Very Quick and Very Quiet.

2. Hit the top edge of the Padlock body with a Hammer or Hammer and Cold Chisel or Screwdriver to break apart the Padlock.

3. Bolt Cutter to snap the Shackle or Mild Steel Chain.

... Solution ... to STOP Thieves

breaking a Padlock and Mild Steel Chain.

The Australian designed,

patented and manufactured "**Steel Shroud**"

plus Australian made 10mm (3/8 inch) diameter, Freight 70 High Tensile Chain.

Padlock Protection™ consists of the patented Steel Shroud that completely encloses a Padlock, its Shackle and both ends of the Chain. We include an Abus 83/45 Padlock and 10mm (3/8 inch) diameter, Freight 70 High Tensile Chain. Padlock Protection Security System designed to replace a Padlock and Mild Steel Chain. Will **STOP** a Leverage, Hammer or Bolt Cutter Attack on a Padlock and Mild Steel Chain. To protect the **Steel Shroud** and **High Tensile Chain** from climatic conditions both are Zinc Plated with a gold passivated finish.

Padlock Protection™ - Security System Includes: "Steel Shroud"

"Steel Shroud" manufactured from a solid Steel Billet using state of the art CNC machining technology.

Australian made, 10mm (3/8 inch) diameter, Freight 70 High Tensile Chain that cannot be cut with a standard Bolt Cutter.

Includes Two Keys

Removable Shackle

Abus 83/45 Padlock can be fitted with a Restricted System be Master Keyed or Keyed Alike.

Padlock Protection™ partially assembled.

STOPS
Leverage,
Hammer,
or
Bolt Cutter Attack
on a
Padlock.

We Can **Custom Make** a "**Steel Shroud**" to fit most padlocks.
